Why TIM?
## TIM BPM Suite compared to Axon Ivy

TIM ✓

TIM Solutions was founded in 2007 with the vision of making business processes the driving force behind your company's success. Our software stands for state-of-the-art technology and groundbreaking innovation in the field of digital process automation. Our experience from over 400 implemented projects shows that every process is as individual as the company using it. We understand the critical role of citizen developers, which is why we have created software that empowers your teams and departments to drive digital transformation across your organisation.

Operational Cockpit with Task Overview and Live Process Status

Key Benefits and Highlights

#1 No-code philosophy
Thanks to TIM´s no-code approach, employees can actively participate in the process using the intuitive web-based interface - no IT know-how required!

#2 BPMN 2.0 industry standard
TIM is the only automation solution worldwide that gives you unlimited freedom to use any BPMN 2.0 standard modelling tool to map your workflow.

#3 Your digital ROI
With TIM, you can count on a fast development phase and an umcomplicated roll-out, saving you time and money and helping you see a return on your investment (ROI) in less than 6 months.

#4 Customizable templates
Simply customize our process templates and get started! Our turnkey customized solutions combine our collective hands-on experience with the expertise of industry experts and universities.

#5 Achieve your goal faster
As a true lightweight, TIM enables smart information logistics and quick adjustments. Benefit from a true continual improvement process (CIP) thanks to automated processes!

#6 Convenient connectors
Our connectors allow you to seamlessly integrate external data sources from existing IT systems into your workflows, making it even easier to connect any number of corporate applications.

#7 Intuitive user interface
The web-based interface ensures everyone involved in the process hast easy access to tasks and processes, while process owners have a continuous overview of the current status.

#8 Excellent customer service
Our customers can attest to our outstanding support in every phase of a project. With an experienced team of experts, we actively support you during the implementation of your project.

Axon Ivy - An Overview

ΛΧΟΝ|VY

Every process automation software has its pros and cons - we want you to know which tool best suits your organisation's needs. In the following overview you will find some facts about Axon Ivy's process automation tool and how it differs from the TIM BPM Suite, so that you can decide for yourself which tool best fits your company´s requirements.

Key Facts

Product:	Axon Ivy
Foundation:	1994
# of Employees:	approx. 50
Headquarter:	Switzerland
Philosophy:	Pro Code

Info: Bought out by Ricoh in 2022

Pricing
(Pricing information as of May 2022)

Professional Designer: 49€ per user/month (minimum of 5, on-premise)
Workflow User: 9€ per user/month (minimum of 25)
Portal User: 2€ per user/month (minimum of 100)

Calculation example:

5 Professional Designer:	245€ per month
+ 100 Workflow User:	900€ per month
+ 100 Portal User:	200€ per month
= Sum:	1,345€ per month

Main Weaknesses

Not suitable for business users/citizen developers: The design tool requires a technical background at a level which business people do not have. This leads to a heavy dependence on IT.

Pro Code Design tool (on-premises): The user interface is like an IDE which requires technical knowledge and programming skills (mostly Java).

Off-shore development team: They have a big development team in Asia which works dedicatedly for customer requests. This means that customers are dependent on paid implementation and can barely do things on their own. Hint: On LinkedIn they only have 50 of their employees but company size seems to be 501-1000.

Difficult learning experience: Due to the complicated design tool and limited documentation resources, the adoption of the product might be hard.

Summary

Axon Ivy has a "pro code" design tool presenting a considerable drawback as it's not suitable for business users or citizen developers. The reliance on an off-shore development team for implementation shows that customers are compelled to invest in paid services for customization and troubleshooting. Consequently, this dependence on external expertise compounds the software's overall cost and limits its accessibility to businesses with substantial budgets and programming resources. Despite its robust features, these disadvantages may deter organizations seeking a more user-friendly and cost-effective solution.
