

# Why TIM?

## TIM BPM Suite compared to Bizagi

TIM Solutions was founded in 2007 with the vision of making business processes the driving force behind your company's success. Our software stands for state-of-the-art technology and groundbreaking innovation in the field of digital process automation. Our experience from over 400 implemented projects shows that every process is as individual as the company using it. We understand the critical role of citizen developers, which is why we have created software that empowers your teams and departments to drive digital transformation across your organisation.

Operational Cockpit with Task Overview and Live Process Status

## Key Benefits and Highlights

### #1 No-code philosophy

Thanks to TIM's no-code approach, employees can actively participate in the process using the intuitive web-based interface - no IT know-how required!

### #2 BPMN 2.0 industry standard

TIM is the only automation solution worldwide that gives you unlimited freedom to use any BPMN 2.0 standard modelling tool to map your workflow.

### #3 Your digital ROI

With TIM, you can count on a fast development phase and an uncomplicated roll-out, saving you time and money and helping you see a return on your investment (ROI) in less than 6 months.

### #4 Customizable templates

Simply customize our process templates and get started! Our turnkey customized solutions combine our collective hands-on experience with the expertise of industry experts and universities.

### #5 Achieve your goal faster

As a true lightweight, TIM enables smart information logistics and quick adjustments. Benefit from a true continual improvement process (CIP) thanks to automated processes!

### #6 Convenient connectors

Our connectors allow you to seamlessly integrate external data sources from existing IT systems into your workflows, making it even easier to connect any number of corporate applications.

### #7 Intuitive user interface

The web-based interface ensures everyone involved in the process has easy access to tasks and processes, while process owners have a continuous overview of the current status.

### #8 Excellent customer service

Our customers can attest to our outstanding support in every phase of a project. With an experienced team of experts, we actively support you during the implementation of your project.

# Why TIM?

## TIM BPM Suite compared to Bizagi

### Bizagi - An Overview

Every process automation software has its pros and cons - we want you to know which tool best suits your organisation's needs. In the following overview you will find some facts about Bizagi's process automation tool and how it differs from the TIM BPM Suite, so that you can decide for yourself which tool best fits your company's requirements.

#### Key Facts

Product: Bizagi Platform  
Foundation: 1989  
# of Employees: > 400  
Headquarter: USA  
Philosophy: Low Code

#### Pricing

(Pricing information as of 2024)

Platform as a Service (PaaS) approach

Monthly payments on account depending on the activity of a process and how often which paths were used, therefore incalculable by the customers.

Either there is a credit balance at the end of the year or an unforeseen extra payment.

#### Main Weaknesses

**Data model required for implementation:** The data model has to be defined at the beginning of a process implementation. This is a huge drawback for business users.

**Pricing:** Bizagi's pricing is volume-based which can be high and incalculable, especially for smaller businesses or organizations with limited budgets.

**Bizagi Modeler and Bizagi Studio on premise:** the process implementation tools are still on premise which is a down-side compared to cloud-based tools.

**Outdated form designer:** The interface of form designer looks complicated and out-of-date.

**Difficult learning experience:** While Bizagi's software is user-friendly, some users have reported that it can take some time to learn all of its features and capabilities.

#### Summary

Bizagi's volume-based pricing model may prove prohibitive for smaller businesses or those with constrained budgets, potentially deterring potential users. Additionally, its requirement for defining a data model at the onset of process implementation poses a significant challenge for business users, complicating the initial setup process. Moreover, the reliance on on-premise tools (Bizagi Modeler and Bizagi Studio) limits flexibility in the design process and acceptance due to its outdated design.
